## Introduction

Welcome to the Digital Media Player (DMP), Swank's linear channel product offering that allows you to create your own custom channels within your organization.

With DMP version 9, we're bringing you the latest in hardware technology, including a smaller, more versatile form factor and enhanced connectivity options to suit every setup, from compact workspaces to rack-mounted configurations. Powered by Windows 11, DMP version 9 ensures top-tier performance backed by the latest security updates, offering you peace of mind in a rapidly evolving digital landscape.

Key advancements include a streamlined design with a singular, powerful video card that eliminates previous complexities, supporting both HDMI and SDI connections for unparalleled flexibility. Furthermore, DMP version 9 boasts new video libraries for higher-quality media playback, including HD Closed Captioning.

The DMP software consists of the following modules:

- **Content Library** – Easily access all your content and enrich your library with custom additions.
- **Intermission Manager** – Engage your audience with automated intermissions or curated playlists, keeping entertainment seamless around the clock.
- **Scheduling Manager** – Effortlessly create, copy, modify, and export your content schedules to keep your channel fresh and engaging.
- **Content Updates** – Stay updated with the latest releases directly through Swank via USB hard drive or network connection.
- **Video Settings** – Take control of audio, video, and overlay settings to ensure the best viewing experience.

## Content Library

Welcome to your Content Library. This central hub allows you to easily manage and deploy your content, ensuring your audience enjoys a seamless viewing experience.

Upon ordering from Swank, your content will arrive via USB drive. Simply insert the drive and follow the included instructions to upload your selections into the DMP system. Should you encounter any issues or if your shipment does not arrive, contact your Swank Account Manager for immediate assistance.

Once uploaded, access your Content Library through the DMP interface to view your complete catalog. Here, you'll find the titles of your loaded content, as well as the associated versions, formats, ratings, durations, and license validity periods. This section is also where you can load your own custom content.

The library details the name, version, format, rating, duration, license start and end date, and indicates if the content was provided by you. If you do not see any titles in the Content Library, see the “Content Updates” section.

Name	Version	Format	Rating	Duration	License Start	License End	Is Custom Content

## Search for a Title

Easily locate any piece of content using the intuitive search function. Simply start typing in the Filter field to narrow down your options.

Name	Version	Format	Rating	Duration	License Start	License End
SHERLOCK GNOMES	CS	MPG	PG	[01:26:22]	10/15/2023	2/23/2024

## Edit Content Title

1. For added clarity or personal preference, you may wish to adjust the names of your titles. Select any item and click "Edit Selected" to modify its name. “Matilda (1996)” was selected in this example.

Name	Version	Format	Rating	Duration	License Start	License End	Is Custom Content
<b>MATILDA (1996)</b>	WS	MPG	PG	[01:38:11]	2/15/2024	2/14/2025	<input type="checkbox"/>
DADDYS HOME 2	CS	MPG	PG13	[01:36:24]	10/15/2023	5/15/2024	<input type="checkbox"/>
GEMINI MAN	YS	MPG	PG13	[01:57:04]	10/15/2023	2/23/2024	<input type="checkbox"/>
SCHOOL OF ROCK	CS	MPG	PG13	[01:49:11]	10/15/2023	2/23/2024	<input type="checkbox"/>
BLINDED BY THE LIGHT	CS	MPG	PG13	[01:57:43]	10/15/2023	2/23/2024	<input type="checkbox"/>
GUARDIANS OF THE GALAXY VOL 3	CS	MPG	PG13	[02:30:16]	10/15/2023	2/23/2024	<input type="checkbox"/>
THE INVITATION (2022)	YS	MPG	PG13	[01:45:05]	10/15/2023	2/23/2024	<input type="checkbox"/>
STEPHEN KINGS DOCTOR SLEEP	CS	MPG	R	[02:31:58]	10/15/2023	2/23/2024	<input type="checkbox"/>
IT CHAPTER TWO	CS	MPG	R	[02:49:21]	10/15/2023	2/23/2024	<input type="checkbox"/>
ZOMBIELAND - DOUBLE TAP	CS	MPG	R	[01:39:03]	10/15/2023	2/23/2024	<input type="checkbox"/>
THE CONJURING THE DEVIL MADE ME DO IT	YS	MPG	R	[01:51:50]	10/15/2023	2/23/2024	<input type="checkbox"/>
LAST NIGHT IN SOHO	YS	MPG	R	[01:56:57]	10/15/2023	2/23/2024	<input type="checkbox"/>
THE POPES EXORCIST	CS	MPG	R	[01:43:32]	10/15/2023	2/23/2024	<input type="checkbox"/>
RENFIELD	CS	MPG	R	[01:33:41]	10/15/2023	2/23/2024	<input type="checkbox"/>
ARTHUR CHRISTMAS	CS	MPG	PG	[01:37:32]	10/15/2023	2/23/2024	<input type="checkbox"/>
THE CROODS - A NEW AGE	YS	MPG	PG	[01:35:15]	10/15/2023	2/23/2024	<input type="checkbox"/>
TROLLS WORLD TOUR	YS	MPG	PG	[01:30:45]	10/15/2023	2/23/2024	<input type="checkbox"/>
SHERLOCK GNOMES	CS	MPG	PG	[01:26:22]	10/15/2023	2/23/2024	<input type="checkbox"/>
A WRINKLE IN TIME (2018)	CS	MPG	PG	[01:49:47]	10/15/2023	2/23/2024	<input type="checkbox"/>

2. Click **Edit Selected**.

3. Under Video Name, enter a **new title name** then click **OK**. In the example, the name was changed to "Matilda".

Name	Version	Format	Rating	Duration	License Start
MATILDA	WS	MPG	PG	[01:38:11]	2/15/2024
EVIL DEAD RISE	CS	MPG	R	[01:36:24]	10/15/2023
DADDYS HOME 2	CS	MPG	PG13	[01:39:45]	10/15/2023
GEMINI MAN	YS	MPG	PG13	[01:57:04]	10/15/2023

The updated title will appear in the Content Library.

## Extend Content License Dates

All content provided by Swank Motion Pictures has a license period. Content may not be played or scheduled outside of that license range. In certain circumstances, you may need to discuss extending the license date with your Swank Movie Programmer.

If the date is extended, you will receive a code from Swank Motion Pictures. The steps below show how to extend the license date using the code.

1. Under Content Library, click **Apply License Extension**

2. Copy the **coupon code** that was sent to you by Digital Services via email and paste it in the text box.

3. Click **Apply** to make the license range changes to the content.
4. If you go to the Content Library tab, you will see the list of content and the new license range.

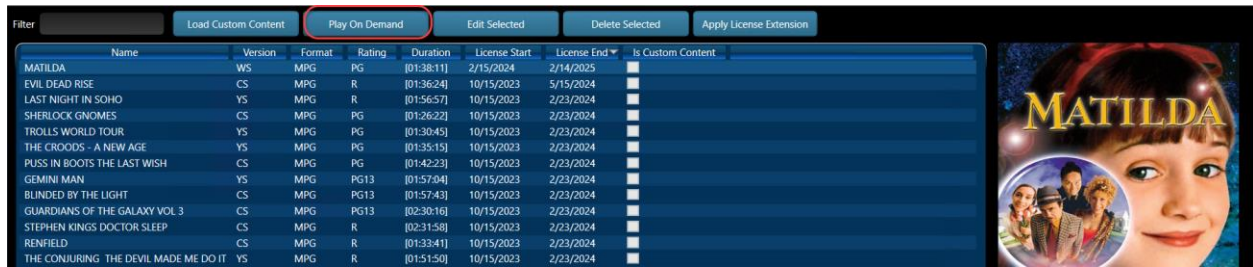

### Play Content on Demand

The DMP application allows content (within its license period) to be played immediately, allowing for flexibility in content presentation. Simply deactivate the schedule feature to play any content instantly, ensuring your ability to respond to real-time demands or preferences.

1. At the bottom of the screen, uncheck the **Enable Schedule** box.

2. Under Content Library, select a **title**. *In the example, Matilda was selected and is displayed on the right side of the screen.*

3. Click **Play On Demand**. Selected content will be displayed. Alternatively, the title can be right-clicked on and Play On Demand can be selected.

**Please note:** While the “Enable Schedule” checkbox is unchecked, all schedules are ignored. Click the check box again to turn the Scheduler back on.

## Add Custom Content to the Library

The DMP supports a wide range of formats. Be sure to test the video and audio playback of your custom content on the DMP, as not all video creation and encoding programs are the same. Please be aware that content cannot be downloaded from the DMP after being ingested.

The supported video specification for custom content are as follows:

- MP4/H264, up to 1920x1080p @23.98fps, 2000kbps/AAC audio 128kbps 2ch
- H265 (HEVC), up to 1920x1080p @23.98fps, 5300kbps

When your content is ready, follow the steps below:

1. Save your content to a portable storage device and plug it into an open USB port on the DMP.

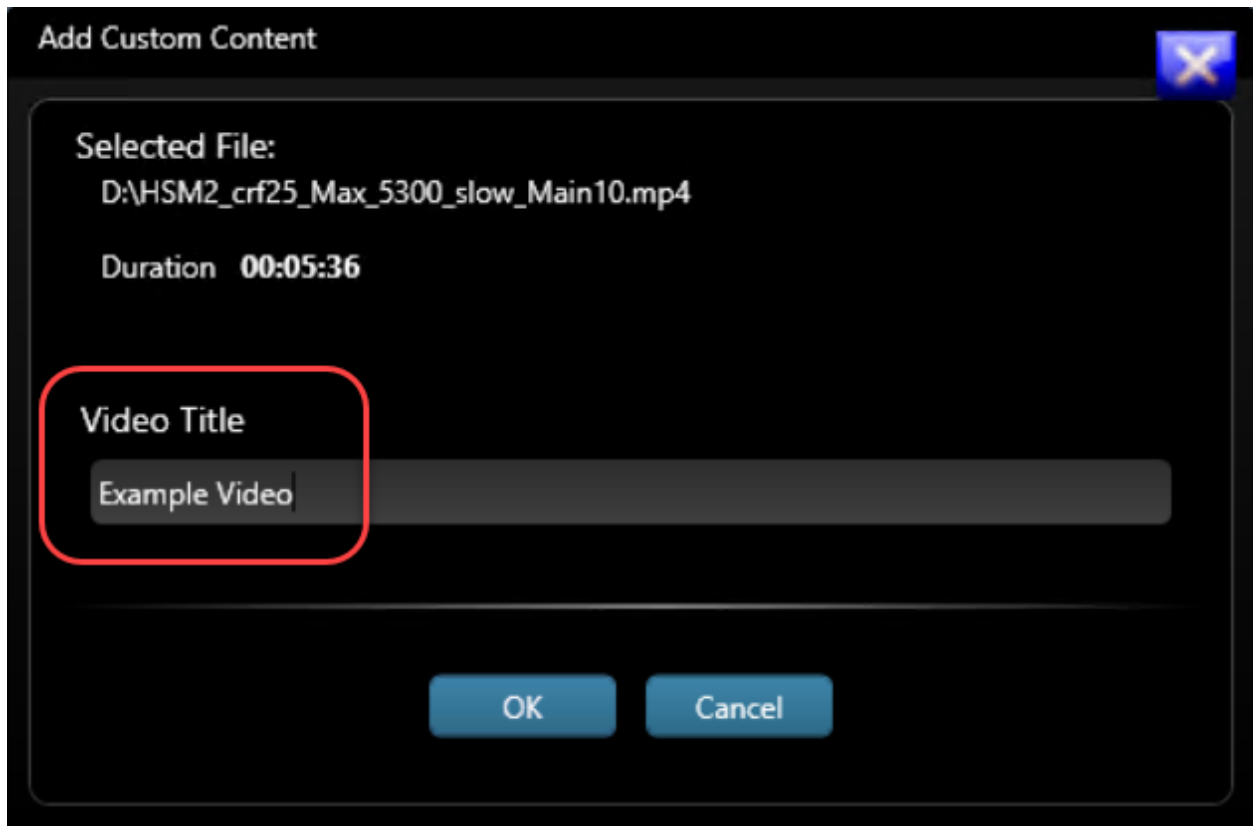

2. Under Content Library, click **Load Custom Content**. This will open the Windows File Navigator.

3. Select the content to be added to the Content Library.

4. Enter a **Video Title** for your content. This title will appear in the Content Library.

*In the example, Example Video was entered.*

Click **OK**.

5. Under Content Library, check for the addition of your content.

Name	Version	Format	Rating	Duration
Wildlife Clip				[00:00:30]
H265 HEVC				[00:12:14]
HSM2_crf25_Max_5300_slow_Main10				[00:05:36]
mpeg2 test				[00:09:56]
Test Title				[00:00:14]
fire psa				[00:01:03]
asteroid (file type test)				[00:00:14]
Example Video				[00:05:36]

## Intermissions

Intermissions are an optional feature which displays upcoming movie information, trailers or your custom content between scheduled content.

## Automatic Intermissions (Next Up)

The default intermission type is Next Up. This intermission displays a static image of the content that is scheduled to play next.

Details pertaining to the title, start time, rating and synopsis. For many movies, a poster/image is also included.

Under Intermission, select **Next Up** for the Intermission Type.

**Please note:** If viewer screens are small, you may turn off the synopsis as it becomes too small to read on many CRT televisions. Uncheck the box shown to turn off the synopsis.

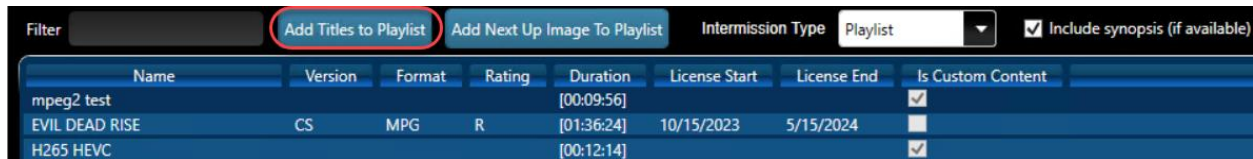

## Customize the Intermission (Playlist)

With the Playlist, you may select content to play as the intermissions.

1. Under Intermission, select **Playlist** for the Intermission Type.

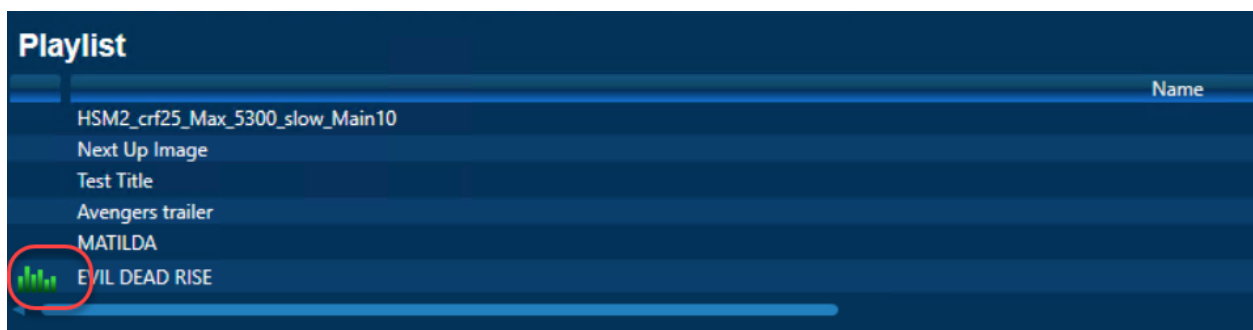

2. Select the **titles** to include in the Intermission. To select multiple titles, click a title and hold the Shift key then click additional titles. *In the following example, Minions 2 was selected.*

Name	Version	Format	Rating	Duration	License Start	License End	Is Custom Content
mpeg2 test				[00:09:56]			<input checked="" type="checkbox"/>
EVIL DEAD RISE	CS	MPG	R	[01:36:24]	10/15/2023	5/15/2024	<input type="checkbox"/>
H265 HEVC				[00:12:14]			<input checked="" type="checkbox"/>

3. Click **Add Titles to Playlist**. The title is added to the Playlist. Note: You must select at least one title or viewers will see a blank video.

The green bars show the current place in the playlist.

Name
HSM2_crf25_Max_5300_slow_Main10
Next Up Image
Test Title
Avengers trailer
MATILDA
EVIL DEAD RISE

The DMP allows a user to add the “Next Up” image into your playlist, so that you can still advertise the next scheduled playback within your playlist.

1. Click the “Add Next Up Image to Playlist” button.
2. In the new window, use the up/down arrows to change the number of minutes to show the image – from 0.5 minutes (30 seconds) to 1200 minutes.
3. Click “OK” to add the entry to the playlist.

You will now see a row added to your playlist of “Next Up Image”, with a runtime of the time you gave. The Next Up images can be placed into the playlist as many times as desired.

The Playlist operates from top to bottom then repeats, always remembering where it left off. If the Playlist is interrupted by scheduled content, the next title in the Playlist will play during the next open timeslot in the schedule.

Re-order the titles by clicking the up or down arrows. Delete a title from the Playlist by selecting the title and clicking Delete Title.

## Turn Off Intermission

You may not want any content to play when scheduled content is not playing.

Under Intermission, select **None** for the Intermission Type.

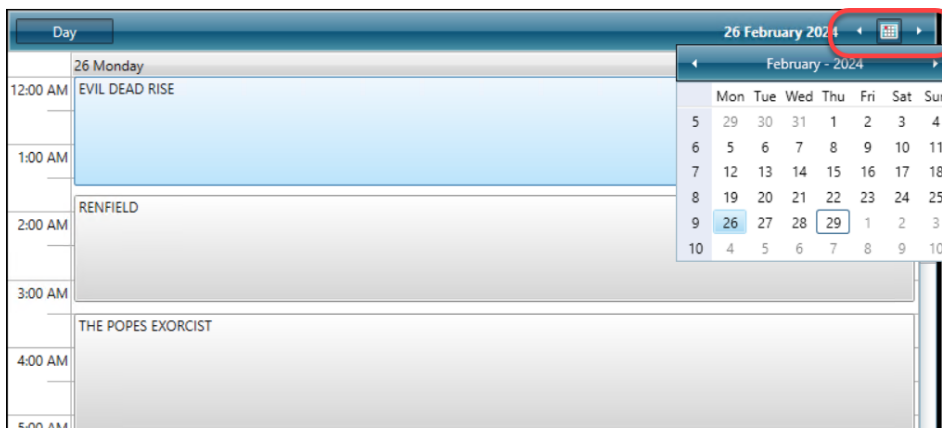

## Schedule

The Schedule menu allows you to create and edit schedules on the fly to meet your needs and flexibility.

### Point and Click Scheduling

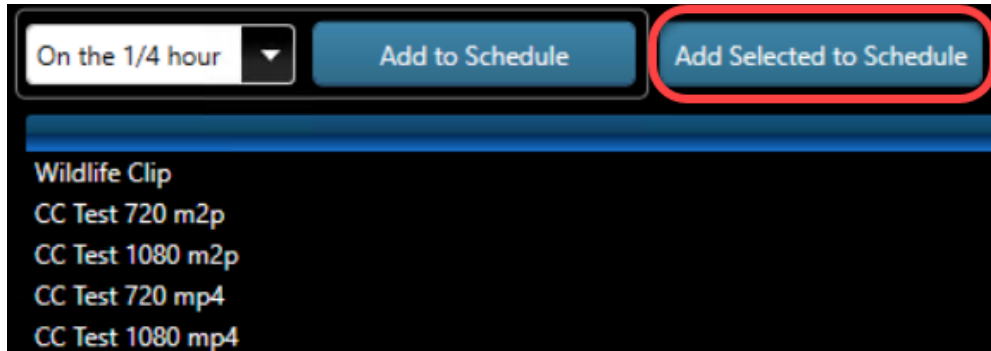

1. Select a Start Date by clicking on the calendar icon.

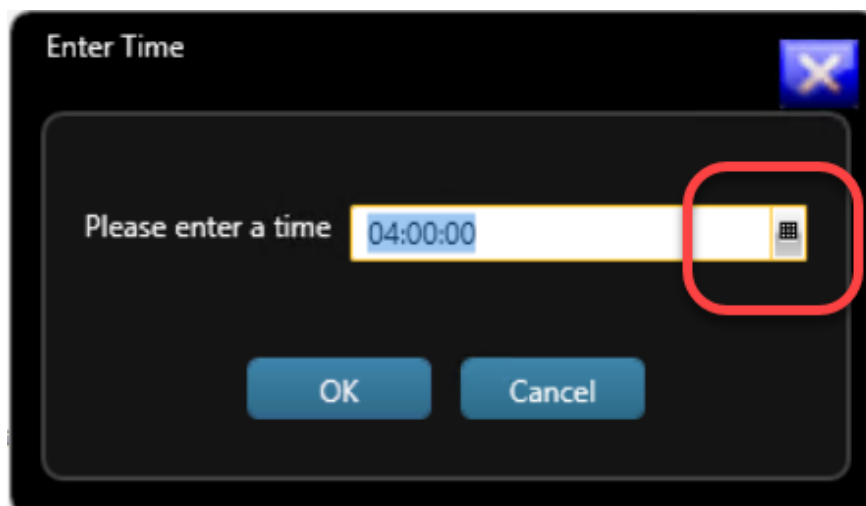

2. Click on the first day of your schedule. *For the above example, today is February 26th and we will be adding to the schedule for March 1st.*

3. Click on a **title** to select it. Be sure to check the End License Date when selecting titles. In this example, Matilda is selected.

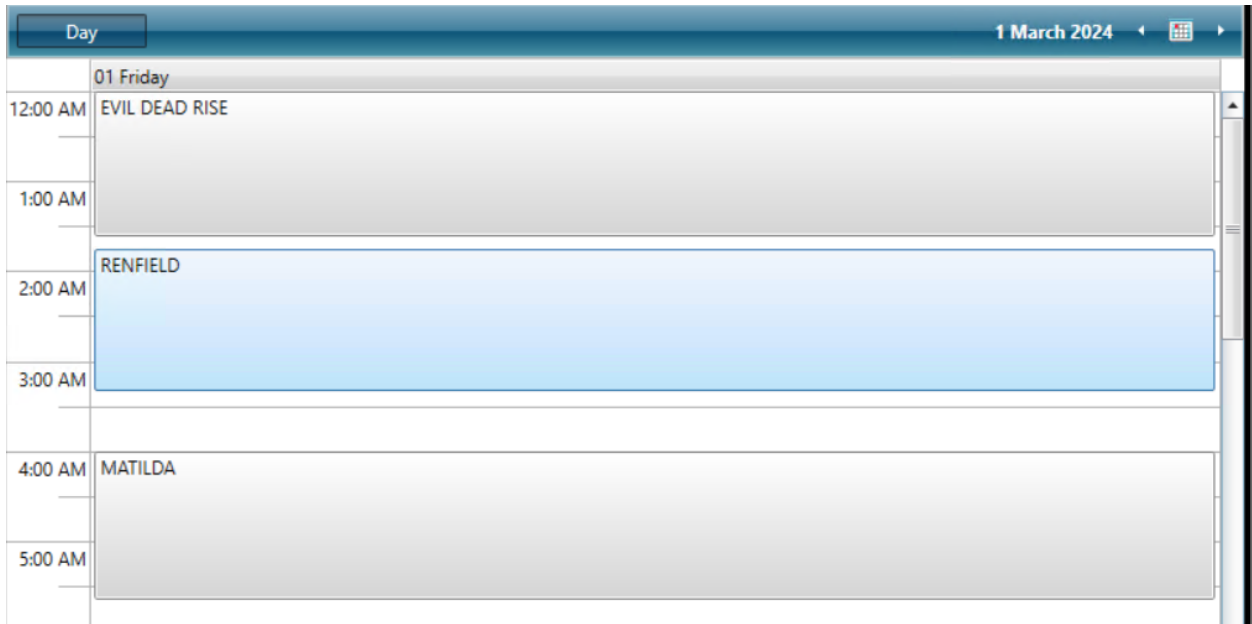

4. Click **Add to Selected Schedule**.

Enter a time or click the icon for a selection and click OK.

The title will be added to the schedule at right. *In the example, Matilda was added to the schedule at 4:00 a.m.*

## 5. Select Additional Titles

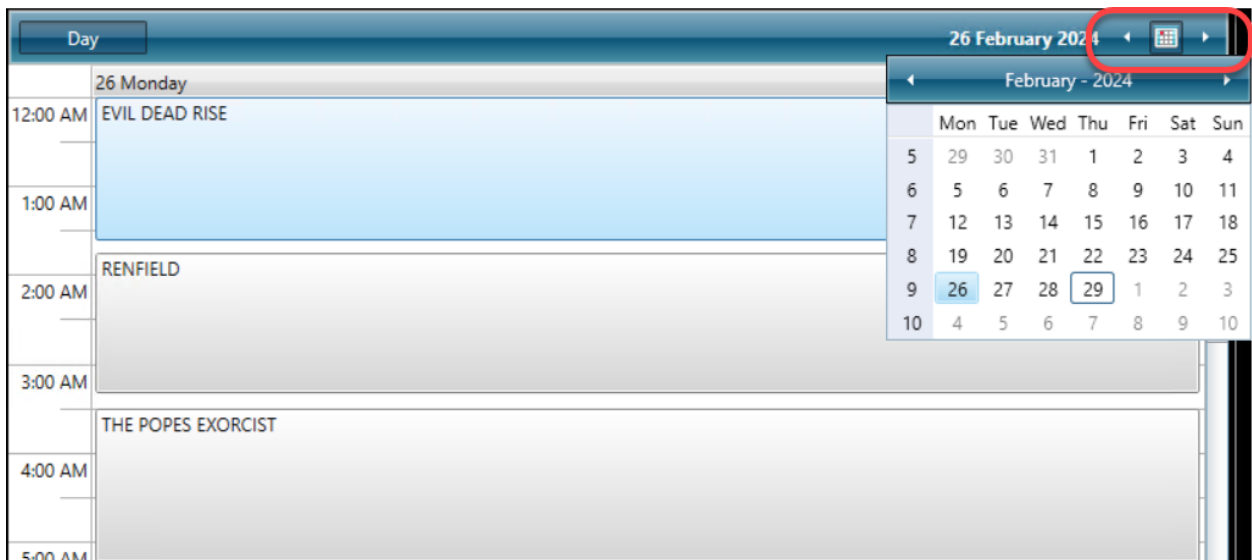

Repeat steps 2 and 3 as needed to complete your schedule.

## Drag and Drop Scheduling

Simplify the process by dragging titles directly onto your desired start times on the calendar.

### 1. Select a Start Date

Click on the **calendar icon**.

Click on the first day of your schedule. *In the example, the schedule will begin on March 1st.*

## 2. Select a Title

Click on a **title** and drag it to the schedule at the time you want the movie to start. *In the example, Matilda was added to the schedule at 6:19 a.m.*

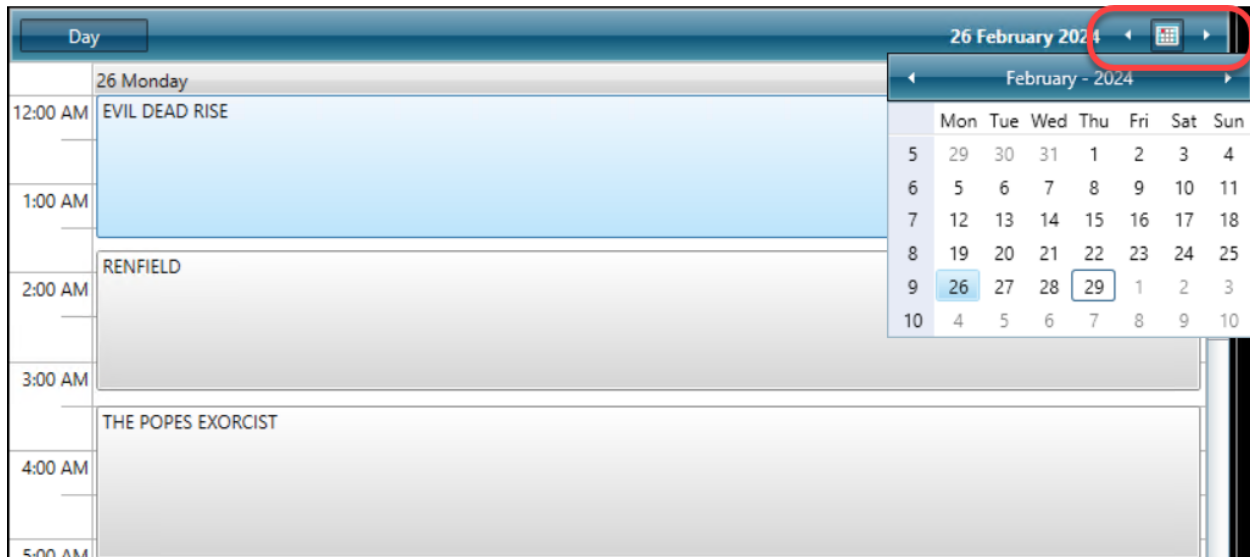

3. Repeat step 2 as needed to complete your schedule.

## Interval Scheduling

Users can opt for automated scheduling by setting intervals, such as hourly or every quarter hour, to keep content flowing seamlessly.

### 1. Select a Start Date

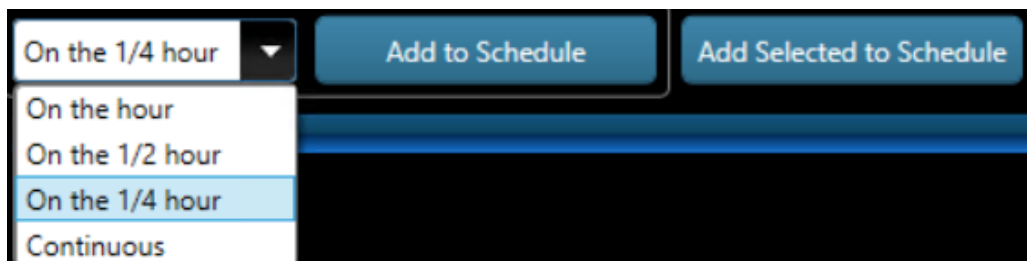

Click on the **calendar icon**.

Click on the **first day of your schedule**.  
*In the example, the schedule will begin on March 1<sup>st</sup>.*

2. Select a Timeframe

You may set the schedule for on the hour, every half hour, every quarter hour or continuously.

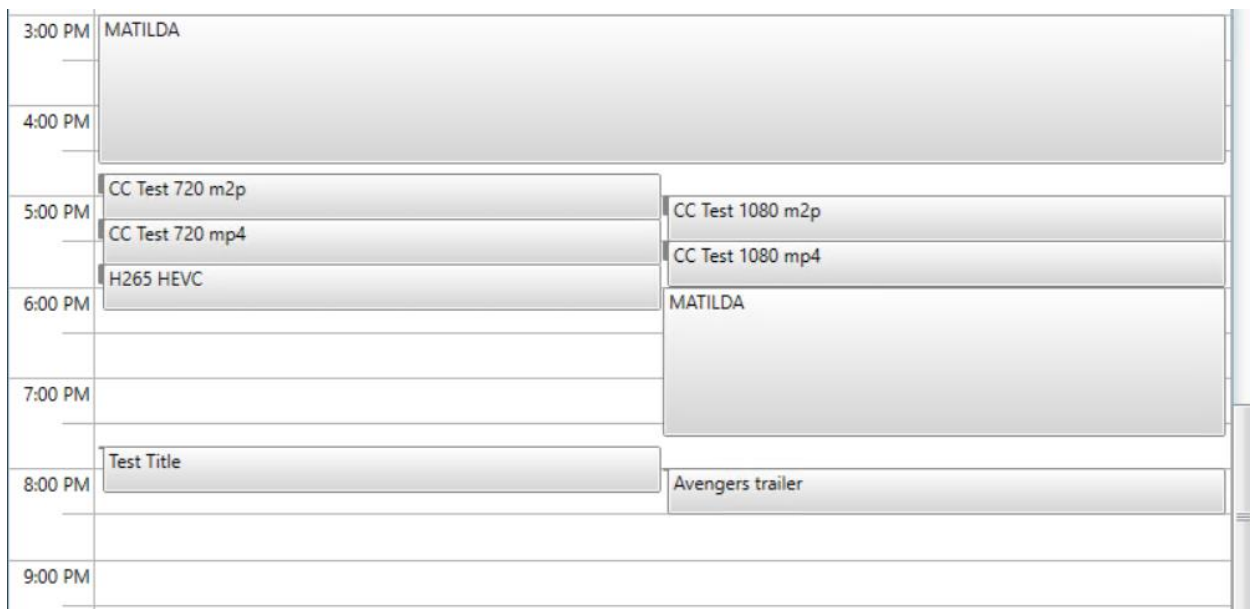

3. Select a Title

Double-click on any **title**. Selected content will be added to the schedule according to the dropdown selection. *In the example, Matilda was selected and added to the schedule on the quarter hour following completed playthroughs.*

#### 4. Select Additional Titles

Repeat step 3. Titles will be added based on the interval selected in step 2.

#### Copy a Schedule

You may copy an existing day or series of days and use that as a template for creating future schedules. For best results, answer these questions:

- Does my date range overlap with content already scheduled?

- Does my date range overlap with itself? For example, does content on the last day end when content on my first day is scheduled to begin?

1. Under the Scheduling menu, click the **Schedule Manager** tab.

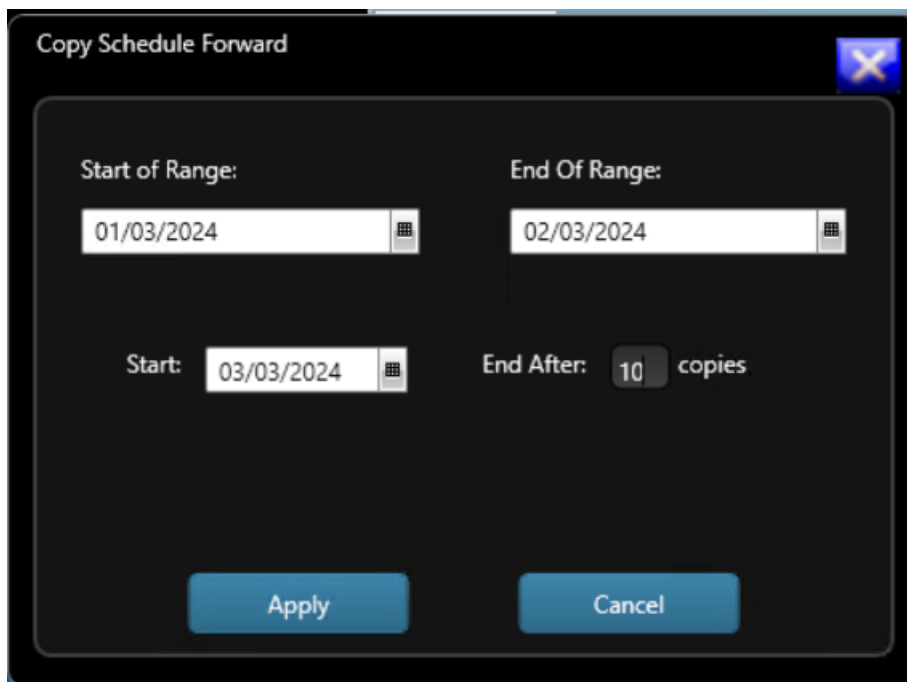

Click **Copy Forward**.

2. Select the **date range** of the schedule you wish to copy.

3. Enter the **start date** (when you want the copied schedule to begin).

4. Enter the **number of copies**, which is the number of times you want the schedule to repeat.

5. Click **Apply**.

6. The DMP application will check for any potential schedule conflicts (for example, content out of the license period). If conflicts exist, Copy Forward will not work and the conflicts will be explained. If no conflicts exist, the Copy Forward process will be successful.

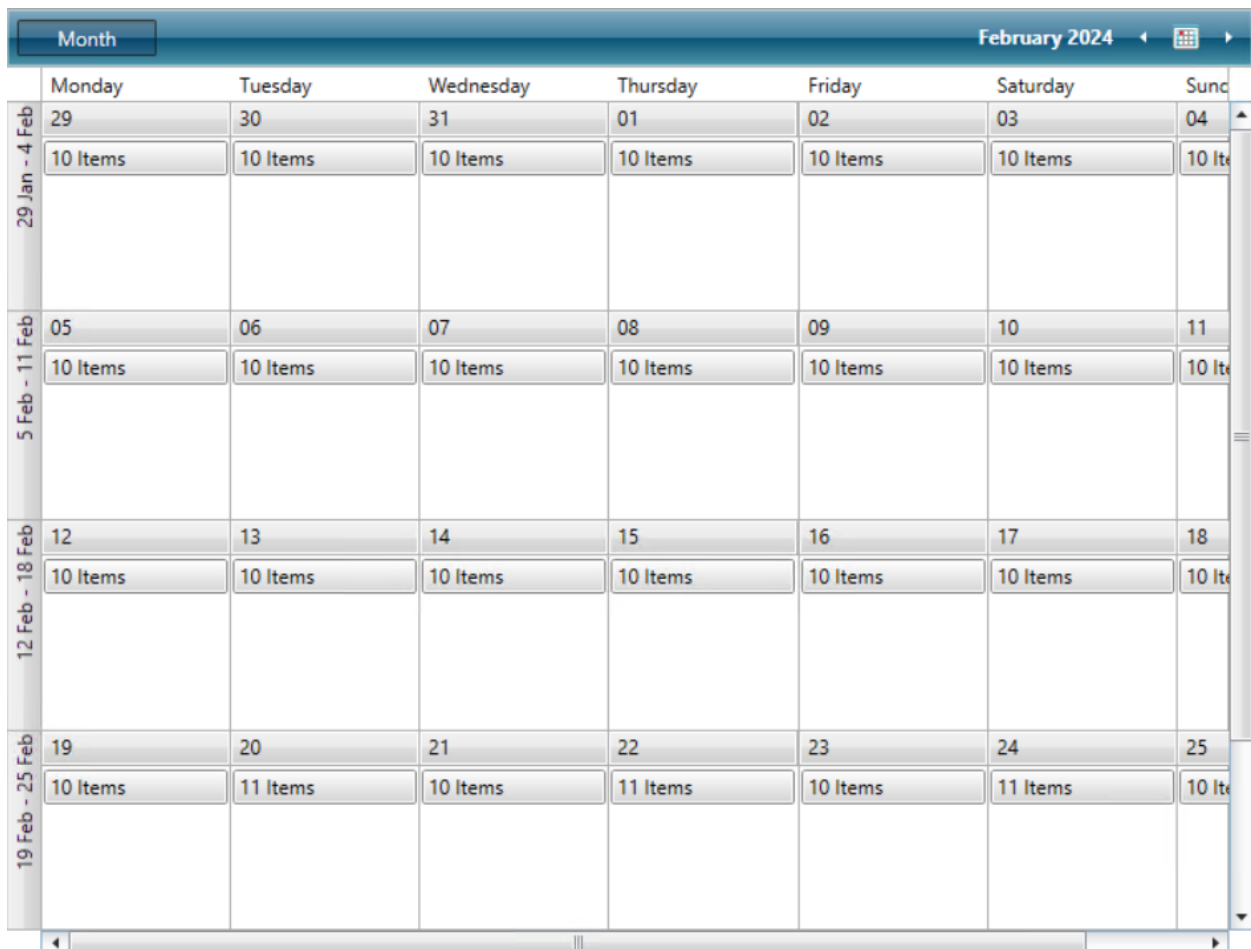

## View Your Existing Schedule

The schedule summary shows what has been scheduled and how much content is scheduled on each day over any selected month.

1. Under the Schedule menu, click **Schedule Summary**.

2. The calendar displays when content is showing and how many titles are scheduled. Click on **any day** in the calendar.

A screenshot of a calendar interface. At the top, there is a 'Month' button and the text 'February 2024' with navigation arrows. Below this is a grid with columns for days of the week (Monday to Sunday) and rows for dates. Each date cell contains a number and a box with the text '10 Items'. The number of items varies by date: 10 items for most days, 11 items for Feb 20, 21, 22, 24, and 25. On the left side, there are vertical labels for each row: '29 Jan - 4 Feb', '5 Feb - 11 Feb', '12 Feb - 18 Feb', and '19 Feb - 25 Feb'. At the bottom, there is a horizontal scrollbar.

3. A schedule summary appears on the left side of the screen for the day you selected.

Starts On	Ends At	Title	Version	Format	Rating	
1:14:00 AM	3:03:11 AM	SCHOOL OF ROCK	CS	MPG	PG13	
3:07:00 AM	5:04:04 AM	GEMINI MAN	YS	MPG	PG13	
5:15:00 AM	6:57:23 AM	PUSS IN BOOTS THE LAST WISH	CS	MPG	PG	
10:15:00 AM	10:20:36 AM	HSM2_crf25_Max_5300_slow_Main10			Not Rated	

## Delete a Schedule

1. Under the Schedule menu, click the **Schedule Manager** tab.

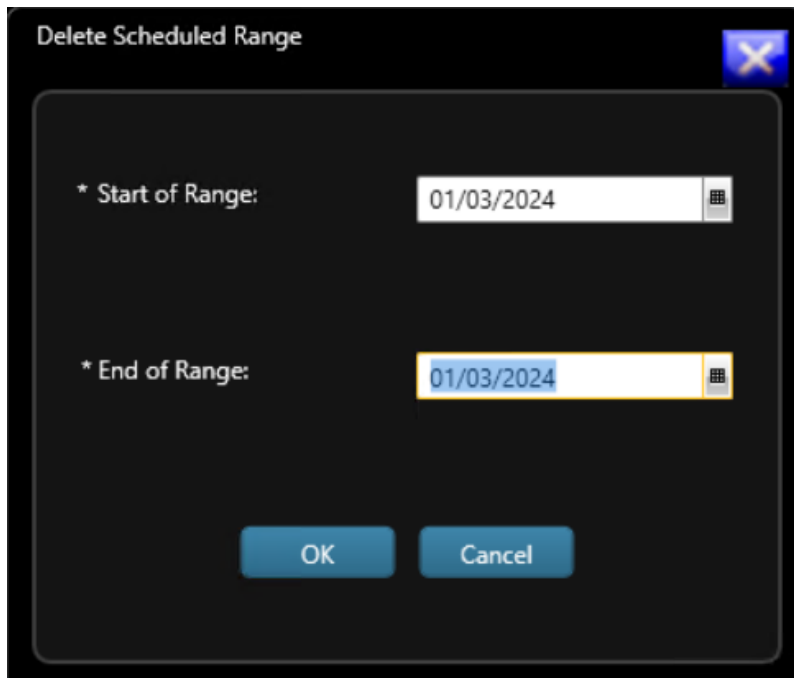

2. Click **Delete Schedule**.

3. Under start of range, enter the beginning date of the schedule to be deleted.

Under end of range, enter the last date of the schedule to be deleted.

If you only need to delete a single day, then enter the same date into both fields.

A dialog box titled "Delete Scheduled Range" with a close button in the top right corner. It contains two input fields: "\* Start of Range:" with the value "01/03/2024" and "\* End of Range:" with the value "01/03/2024". Both fields have a calendar icon to their right. At the bottom, there are two buttons: "OK" and "Cancel".

After both dates are filled in, click **OK**.

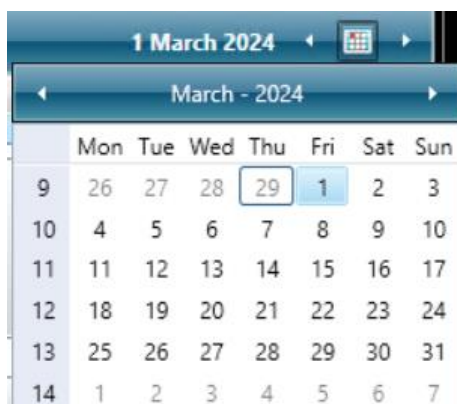

## Delete Scheduled Content

1. Under the Schedule menu, click the **Schedule Manager** tab.

2. Click on the **calendar icon**.

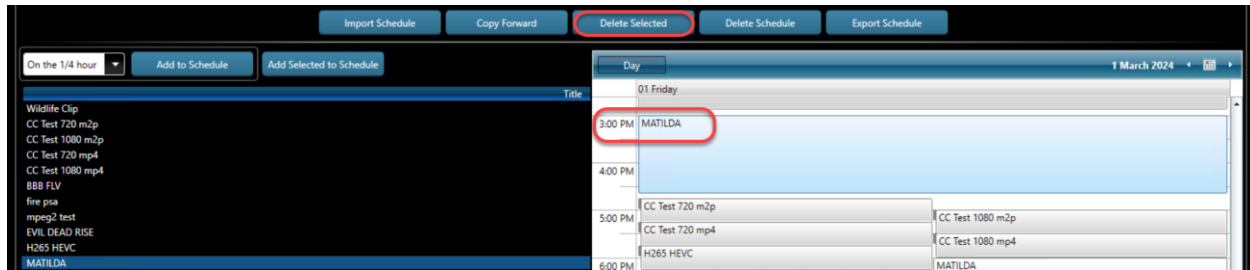

Select the **day** of the schedule to be modified.

A calendar for March 2024. The header shows "1 March 2024" and "March - 2024". The days of the week are Mon, Tue, Wed, Thu, Fri, Sat, Sun. The dates are arranged in a grid. The date "29" is highlighted with a blue border, and the date "1" is highlighted with a blue background.

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
9	26	27	28	29	1	2	3
10	4	5	6	7	8	9	10
11	11	12	13	14	15	16	17
12	18	19	20	21	22	23	24
13	25	26	27	28	29	30	31
14	1	2	3	4	5	6	7

3. Click on the **title** to delete. *In the example, "Matilda" is selected.*

Click **Delete Selected**.

4. Click **OK** to delete the title or **Cancel** to keep the title.

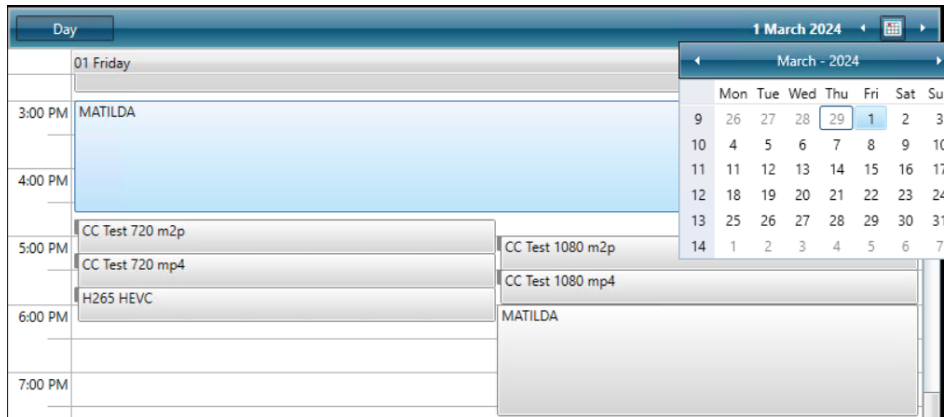

## Change the Time of Scheduled Content

1. Under the Schedule menu, click the Schedule Manager tab.

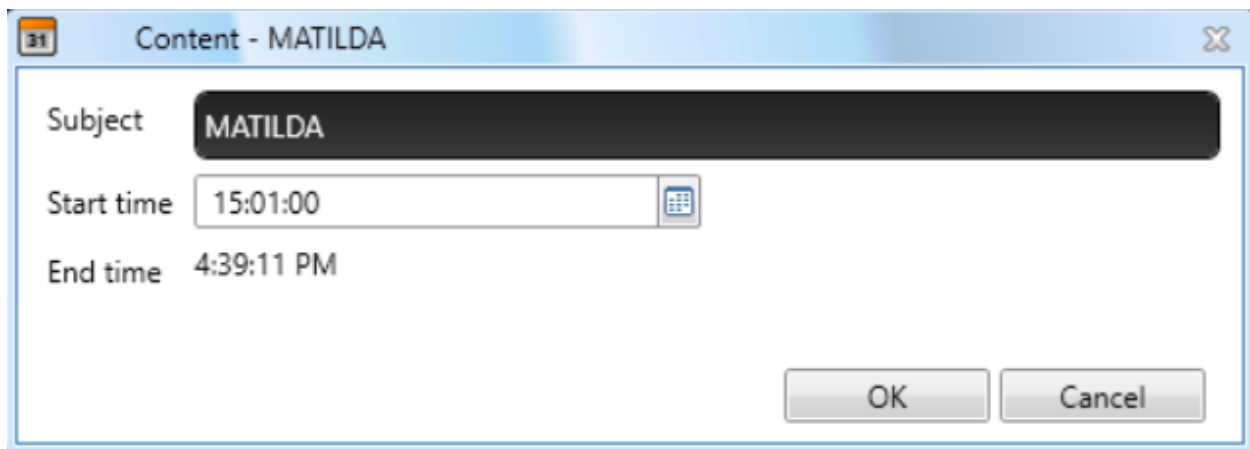

2. Click on the **calendar icon**.

Select the **day** of the schedule to be modified.

3. Double-click on the **title** to modify. *In the example, Matilda was selected.*

4. Enter a new **start time** or click the clock to select times on the hour.

5. Click **OK** to change the time.

## Import a Schedule

To import a schedule you will need a copy of the schedule on a USB drive.

1. Connect the USB drive with the schedule to the server.
2. Open the Digital Media Player (DMP) application.
3. Go to Schedule Manager.
4. Select Import Schedule.
5. Select the appropriate schedule for your channel and import.

## Export a Schedule

The schedule for a DMP can be exported in several different formats including:

- Comma-Separated Value (csv) – a raw, comma-delimited list of schedule lines
- iCalendar (ics) – a common export/import format for calendaring and CMS software
- Another DMP machine – for another DMP installation from Swank

1. Click on the Export Schedule button.

2. Plug in a thumb drive or portable storage device and specify where to save the file.

Click **OK**.

3. Select the export format and start and end dates to export.

4. The software will export the schedules within the given range to the location specified.

# Settings

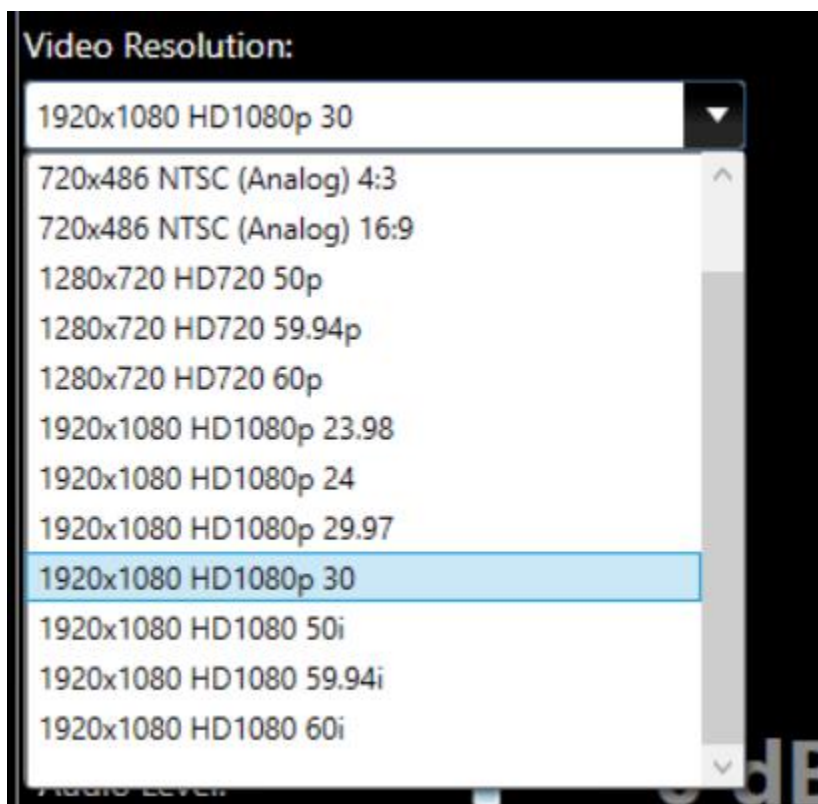

There are several functions under Settings to help ensure that the DMP runs smoothly.

## Video Resolution

The default video resolution on the DMP is 1280x720. You may adjust the resolution to match the viewing requirements of the projector or televisions showing the content.

1. Under the Settings menu, click on the **arrow** to display the options.
2. Select a resolution.

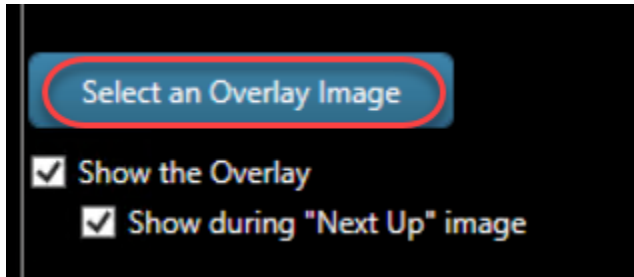

## Brand the Channel

The Digital Media Player may be configured to incorporate a logo on the player to brand the channel for your organization. The supported image types include: BMP, JPEG, PNG, and GIF. If you want to allow the video to “bleed through” the image, utilize a transparent (alpha-layer) image.

1. Under the V Settings, click **Select an Overlay Image**.

2. Select the logo or image from a USB drive.

Then click **Open**.

The image selected will appear on the Settings page. *In this example, the Swank logo was added to the player.*

3. Click the “Show the Overlay” box. The image you selected appears on the output screen as shown below. *The example on the left shows a solid image, and the image on the right displays an image with alpha-layer transparency.*

4. Click the “Show during “Next Up” image if you want to show the logo in this location. *The example on the left shows a solid image, and the image on the right displays an image with alpha-layer transparency.*

## Audio Level

The audio output level can also be adjusted. Use the slider to adjust the amount of gain/loss on the output line.

## Support

## Drive Space

Users can see how much storage space is used and is still available for content in the DMP.

## Application Localization and Culture

You may adjust the localization of the DMP into other languages from the dropdown list below.

Movie Drive  
1719.24 GB Free of 2000.26 GB

Language English (GB)

Technical Support:  
Toll free: +1-866-815-7719  
Local: +1-314-984-6295  
email:  
support@swankmp.zendesk.com

Mailing address for returned update drives and equipment:  
Swank IT&D  
Attn: Digital Returns  
10825 Watson Road  
Suite #200  
Saint Louis, MO 63127 USA

## Conduct a DMP Health Check

1. Located beneath the Drive Space indicator is the Health Check button. This can be used to check the DMP's current status.

2. You will receive a message with the DMP's status. If you have any concerns, please call us for assistance.

3. Click **OK** to close the message.

## Export Activity Logs

If you have any issues with the DMP, our technical support team will be happy to assist you. Often, they will request an export of the machine's logs for analysis. This can be created in just a few clicks.

1. Click **Export Logs**.

2. Select a location to save the exported log files and click OK. (It is the easiest to save to the Desktop. After clicking OK, the process may need a minute.)

3. You will receive a message that the export has been saved. Click **OK**.

The zip file is typically very small and is easy to attach to an email.
